Applicants' Response filed April 13, 2007 is acknowledged. Claims 23-26 remain under consideration.

The indication of finality set forth in the last Office Action is withdrawn.

A new title of the invention is noted.

A new abstract of the disclosure is further noted.

In the last Office Action claims 23-26 were rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contain subject matter that was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventors at the time the application was filed, had possession of the claimed invention. This is a Written Description rejection. It was asserted Applicants have not described any therapeutic regimens in which any compound of the present invention is administered to inhibit inflammatory bowel disease.

In response, Applicants cite various parts of the instant specification and urge compliance to the written description requirement. Specifically, on page 3, line 5 through page 7, line 28, a mere statement drawn to inhibiting inflammatory bowel disease is noted. However, according to *Genentech Inc. vs. Nova Nordisk*, "[A] patent is not a hunting license. It is not a reward for a search but a compensation for its successful conclusion and 'patent protection' is granted in return for an enabling disclosure of an invention, not for vague intimations of general ideas that may or may not be workable." (42 USPQ 2d 101, Fed. Circuit 1997). Page 26, line 20 through page 33, line 30, depict a general synthesis of the claimed compounds; page 38, line 22 through page 39, line 8, depict methods of determining estrogenic and/or anti-estrogenic potential; page 39, lines 9-28, depict an estrogen receptor binding assay; page 34, lines 1-26, depict administration of the claimed compounds for any purpose; page 34, line 27 through page 38, line 21, describe dosages and dosage regimens.

Because the disclosure does not provide an adequate written description for the claimed genus of compounds in methods of inhibiting inflammatory bowel disease that would indicate Applicants were actually in possession of the claimed methods at the time the invention was made, the rejection of record of claims 23-26 under 35 U.S.C. 112, first paragraph, is maintained for the reasons of record.

The elected species compound (-)-cis-6-phenyl-5-[4-(2-pyrrolidin-1-yl)-ethoxy]-phenyl]-5,6,7,8-tetrahydro-naphthalen-2-ol is free of the prior art.

No claim is allowed.

THIS ACTION IS MADE FINAL. Applicants are reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this Final Action is set to expire **THREE MONTHS** from the mailing date of this Action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this Final Action and the Advisory Action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the Advisory Action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the Advisory Action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this Final Action.
